I am pleased to endorse the **States of Consciousness** (<http://altstates.net>) International Academic Web Portal. After decades of neglect, the topic of human consciousness is the focus of considerable research and speculation, especially on the part of psychologists, neuroscientists, psychiatrists, anthropologists, and philosophers. This Web Portal spans the world, and is a vital source of reliable, accurate information about a topic that will increase our understanding of humans and other sentient beings.

— **Stanley Krippner**, Ph.D, Professor of Psychology, Saybrook University, San Francisco, California, U.S.A.
